# CREWS

The CREWS project addresses the urgent need to enhance disaster risk reduction capacities in the Baltic Sea Region. It leverages the potential of civil society in disaster scenarios, aiming to empower local communities and bridge the gap between formal and informal actors in disaster management. Aligned with the EU Strategy for the Baltic Sea Region, CREWS contributes to PA Secure by strengthening capacities for preparedness and response, while fostering a common societal security culture in the BSR, and to PA Innovation.

**This #MadeWithInterreg project** helps drive the transition to a green and resilient Baltic Sea region.

Organisations from the following countries cooperate together to make that happen:

Germany, Denmark, Estonia, Finland, Latvia, Lithuania, Poland, Sweden
